

FOR IMMEDIATE RELEASE

Halco Announces CoverShield Safety Coated Lamps

Norcross, Ga., July 29, 2009 – Halco Lighting Technologies® has introduced CoverShield™ safety coated lamps to their product offering. The protective coating meets industry regulations for glass and chemical containment. In the event that a lamp ruptures whether by impact, dropping, unusual stress or thermal shock, CoverShield's protective coating will contain glass shards and other material within the envelope. This containment helps offset the risk of contamination or injury while eliminating the expense of cleanup.

The CoverShield product line includes CFLs, Linear Fluorescent, HID, General Service Incandescent and Heat Lamps. Linear lamps are NSF, CFIA, USDA, FDA and OSHA approved. Custom coating is available for any HLT product.
