The ProLED Select Backlit Panel Series provides a high performing, efficient solution to compliment any commercial or industrial application. This innovative fixture is both Wattage and CCT Selectable to make it one of the most versatile flat panels on the market.

Conversation Starters

What lamp or fixture are you replacing?

Do you encounter projects that the end user is unsure of the CCT or Wattage required for the project?

Are you looking for a modern look and feel to your space?

Are you looking to rationalize inventory or reduce operational costs?

FAQs

- **How do I select the CCT and Wattage?** You can select the required CCT and Wattage via the two very accessible dip switch on the junction box.
- **As the light source is not recessed, will there be glare?** No, the low glare diffuser provides maximum visual comfort which is 'lamp like' in output.
- **How many SKU's are covered by stocking these products?** We cover 27 product options in just three SKU's
- **What mounting options are available?** We offer Surface Mount Kits and Flange mount Kits for all 3 size panels
- **Competitor bid lower?** Halco offers a competitive quote process to beat the price of competition
