Detection Coverage

Lux on/off

Adopted dual PD technology, HB01DMS-A/B is able to differentiate artificial light brightness from natural light after installed inside the fixture, and automatically turn off light when ambient brightness exceeds preset lux level. Preconditions to use the Lux-off function:

- 1. Stand-by period is $+\infty$;
- 2. Stand-by dimming level is on 10%, 20%, 30% or 50%;
- 3. Daylight threshold is on 10Lux, 30Lux, 50Lux or 100Lux.

Application – Lux on/off

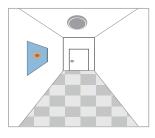

Light automatically on when ambient brightness is lower than preset lux level.

Light dims to stand-by level if no motion detected after hold time.

With insufficient ambient brightness, light dims to 100% when motion detected.

Light off when ambient lux level is higher than preset lux amount.
